

Club	Is your Club able to undertake training? If not, why not.	What % of training is your Club currently able to undertake compared to pre-COVID19 training.	When does your Club anticipate being back to full training?	Has your Club been able to train at your usual venues? If not, why not and have you been able to find an alternative venue.	Further comments
Henley Leisure Centre SC	No – GLL who operate the centre/pool for South Oxon District Council have not opened the pool claiming they have not been paid by SODC	0%	Unknown	See Qu 3	Nil
Didcot Barramundi	Yes	50%	November	Didcot Wave - Open, Oratory School - Closed until September, Headington Girls School - Closed until November, Radley College - New to us and open until Xmas	Didcot Wave operated by GLL has doubled our cost of lane hire to £25 per hour - this is not sustainable and we're seeking an urgent review with them. No indication of costs from the two schools yet.
COOSC	Yes, but only currently using one independent school pool	We have approx. 40% of pool time currently available – but only because we are able to train during the day on weekdays during the holidays. We expect this to be markedly reduced once the children go back to school to more like 20% – as it limits our time available for training. Fusion currently haven't opened ANY of their 3 pools that we use – and of the 6.5 hours per day that we have requested for September – which is our bare minimum to offer pool time to all our squads, they have currently offered us only 2.5 hours per day. Our lessons programme has completely stalled from September onwards.	I honestly cannot see that happening until well into next year – and will only happen when Fusion reopen all 3 of their sites.	No – we have hugely relied on Oxford High who have been great at allowing us pool time. Our other independent school have said they won't open until after October half-term now. Fusion are opening Ferry in September – but have no plans to open the other two pools (one of which, Leys, is our main pool base). We have been offered time at Wycombe Lido, at an extortionate rate, and we have also secured some time at Kidlington and Radley pools, which we don't usually use.	We are finding ourselves in an increasingly desperate situation. Our membership base is contracting, we don't believe we can charge full fees when we are offering much less than usual pool time, and our staff costs are about to increase massively due to the furlough scheme ending. Between Fusion and the City Council, we are getting absolutely zero support. We need more help and more lobbying from Swim England – it feels like swimming clubs are getting the least support possible right now.
BBFS	We are able to train but not in our home pool. We are training at a pool 10 miles from our town.	On average we are pool training at around 55%. Different squads have different percentages. This is supplemented with video conferencing so with land training we are around 80% contact time on average.	Our pool will remain closed until at least mid-October so we don't know as yet. Another pool (18miles away) is trying to accommodate us closer to normal training hours although we don't feel that this will be feasible as the swimmers/parents will need to be getting to school/work.	Bicester is closed so we are training at Stowe School. The air conditioning at Bicester has been condemned and needs replacing. Parts needed are on back order. We are sharing the facility with Maxwell swim club.	As we are training away from our home pool we have members who are unable to train as their parents don't drive and people are reluctant/unable to car share due to Covid. This will be exacerbated in September as the pool available to us is even further away. We have had several resignations during lock down both due to loss of interest, reluctance to travel. We reduced fees to 30% throughout as we continued to offer zoom contact/land training. We recently increased fees to try to cover pool and coaching costs. Although this was raised to a level where we hoped to break even the loss of members has meant that we are running at a loss. Without a possible date to return to Bicester we don't know how long this is sustainable for. However, during lock down Coaches from different clubs have worked together so our swimmers have been able to participate in inter-club kahoot competitions, have done some HIT and yoga sessions with other clubs via video conferencing. And Noel, Head Coach at Maxwell SC has worked with us to enable both clubs to use Stowe School (not to forget that Stowe agreed to open throughout August). A real feeling of team work and people pulling together.
AVSC	Yes	It varies per squad but we have 17 pool hours booked at present compared to 22-24 in pre-Covid times.	Not in the foreseeable future as when schools go back our training hours are reducing a little as we are not allowed on site until after 6pm.	Yes for one pool. The other pool has restricted us to 18 swimmers max in a 6 lane pool. The cost of this plus lifeguards / coaches and full hiring charge has meant that hiring this pool was very costly compared to our other pool which have been exceedingly helpful.	Nil
Kidlington & Gosford SC	Yes	29%	Uncertain due to usual pool still being closed.	No. Pool still closed. We have used Banbury open air pool, but with limited access.	We only have 3hrs of pool time across our 4squads. Unofficial word is that our pool will open in Sept.
NPSC	Yes, fully back to training with slightly shorter squad times than before	80%	Depends on Swim England advice	Yes, using all of the same venues	Nil
4SSC	Yes, starting 4th Aug 2020	About 80%	September	No. One out of our 5 pools opened.	We are hoping to be back in 3 of our 5 pools by the start of October 2020.
WDSC	Yes	All have the opportunity to train apart from masters squads – however much less hours	Don't know as still have 1 training pool closed – we are hoping/planning it opens for September. However even if it does open we are still restricted hours from leisure provider plus social distancing measures in places (less swimmers per lane)	One pool open – however initially only 3 hours per week and now up to 7 hours a week. As other pool still shut we are able to get hours at our local RAF base camp but the hours we have will not all continue in September. We need our other pool to open so we can transfer back and keep some RAF base hours as needed.	Increase pool charges from leisure provider a problem. Hoping leisure provider will increase our hours into September but we waiting to hear (as of 18/8)
Banbury SC	Yes	Probably around 40-50%, due to one of the 2 venues we use still being shut.	Hopefully sometime in Autumn.	Using one of 2 venues at the moment. Other venue still has not opened its pool. No other local venues available.	In Banbury seems decision from local council / sports centre management is to only open one of the public pools in Banbury, hence why we are only using one pool.
Maxwell	Maxwell can train out of Aqua Vale, Stowe school and via Zoom home training	Most squads have about 80-90% of their pre covid pool hours. The Performance squad is down by 33%.	No real ideal! We are accommodating social bubbles and limited pool availability at the moment. It is possible that Covid provision and pool availability will improve in September... but no real ideal	We no longer train at Stoke Mandeville. This is due to a pragmatic arrangement with Aylesbury SC. AVSC swim out of Stoke Mandeville and Maxwell use Aqua Vale in order to preserve Covid social separation	Running a swimming club with out revenue from meets is going to be very, very challenging!
ADSC	Yes	95% Only Learn to swim not back as their pool hasn't reopened. Almost everyone else is on 50%+ training	No indication from th epool son this.	Yes. Though ADSC and MAXWELL have co-operated and spill venues so we each train out of one pool, avoiding cross-over or challenges for space.	Nil
Witney Synchro	Yes - 8th Aug		30% Difficult to determine as it's very piecemeal at present – no long-term water allocations being given at all. Also, by the nature of the sport social distancing is contrary to full training – no lifts allowed, team swims only in 4's not 8 or 10 as normal, allowing swimmers 6m2. Swimmers can work on own fitness and stamina and flexibility but not routine swimming in squads.	NO. We train at Headington School who are not allowing any outside lets until end of October at earliest but will let us know in early October if we can return. Initially we could not make any contact with Windrush Leisure Centre /GLL/Better but eventually have made a contact in West Oxfordshire Council who is running the leisure Centres reopening – instead of our normal 3 hours/week, we have been allocated a slot for 3 weeks in August of 1.5 hours/week. We have also had our booking fee doubled. We are waiting to hear about September onwards. Alternative venues : we have managed to book 5 weeks at an open-air Lido but will make a loss of approximately £45.00-£75 per session even by charging 30% more on swim fees but needed to get back in water. This pool closes early September. We also have secured a slot at an alternative school pool beginning end of September – end of October with an option to extend but lost the slot we were told we could have initially. The capacity allowed in this session means more limitations. Land venue we can restart September but our normal time slot overlaps with our current water slot in Witney but as we don't yet know September's pool slot, we may have to lose money on Land slot.	It has been extremely time consuming and frustrating trying to contact facilities that do not answer their normal facility users. Or may not agree to giving "first refusals" to clubs that have booked certain time slots for over 40 years! There doesn't seem to have been any loyalty shown in certain areas. We are now the only Synchronised Swimming Club in Oxfordshire as the other Synchronised Swimming Club has now folded.
