You can also use the rankings database to see how your swims stack up against other swimmers.

You can look by age on day, age at end of year, by County (Kent), Region (London) against the whole country and by Home Nation (England, Scotland, Wales etc) and by Club. You can change the time frames of your search between All time or Last 12 Months. You can search by course type long course 50m and short course 25m. However, as a standard you should always use rankings for the last 12 months, age at end of year, also select the age your swimmer will be at the end of the year to make any meaningful comparison.

The rankings data base is very useful especially if your swimmer achieves a Kent County consideration time or a London Regional consideration time, as not all swimmers who achieve these tough times are selected to enter. For example usually the top 28 per age groups/gender for a 50m event are accepted down to only 8 for the 1500m.

Knowing where you are ranked gives you some idea of whether your swimmer is likely to be selected or not for events at this level

In the last column you will see a number under the heading FINA. FINA or World Aquatics as it's now called, operate a points system that is used within swimming to score and rank swims to determine a swimmer's performance across different events and distances.

The higher the FINA point score, the better the swimmer's performance is considered to be relative to other swimmers in the same event.

For a truly accurate ranking position you will need to convert your best time so that you have both a long course and its short course equivalent. Then look at the rankings of the other course type to see where that time would slot in. You need count all the names above that position that do not appear in the other list and add that number to previous rank to give your overall position.
